

LAMPAMP was created by musicians and technologists with the community in mind.

YOUR CITY. AMPLIFIED.

Music Tourism

Helping cities promote *their* sound
 Showcasing music, art, and culture
 Designating commercial zones

Supports Smart Data Initiatives

Collecting data in neighborhoods
 Sharing data for improved visibility
 Using public data to improve efficiencies

Safe and Legal Public Performances

Convenient for artists to perform
 Easy for cities to *monitor* and *manage*
 Bringing communities together
 Helping artists get paid

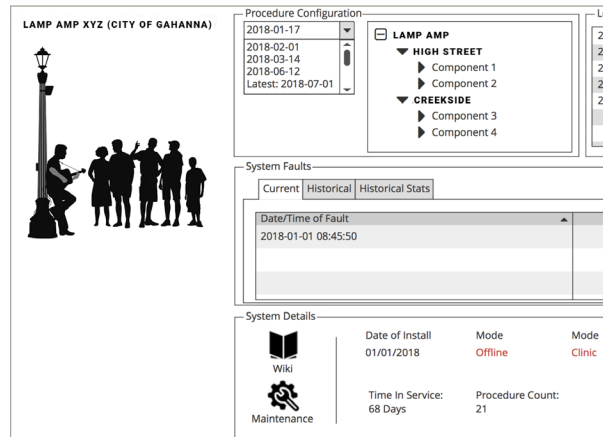

Easy To Install and Maintain

Attach to *existing* light posts
 Solar and battery powered options
 Digital monitoring and maintenance

Improved City Brand

Innovative *smart* technology
 Innovative *music* technology
 App promotes city exploration

Plug In Your Smart Hub

Remote Data Collection

LampAmp *constantly* monitoring sensor data features you select and we install.

The admin can visualize the location of *each* LampAmp and click to zoom into each unit to see detailed insights on data being collected.

All log files and data collected are stored in a smart hub that can be shared and visualized by the admin.

Remote Control and Management

The audio and power of each LampAmp can be managed through on/off controls, loudness controls, digital maintenance, and real-time voice communication can help facilitate interaction between the performer and the admin.

342 S High Street, Unit 301
 Columbus, Ohio

Smart Sound for Smart Cities

Light Up Your Streets With Sound

Our intelligent sound and IoT tower help cities launch *smart hubs*. Sound can be easily monitored and safely managed while you collect data from the weather, sidewalk, and roadways.

Amp Up Your Downtown

Our plug-and-play design makes it *easy* for artists to perform publicly in designated areas, at parks, on sidewalks, and in creative corridors while shows are *safely* measured and monitored.

REQUEST A DEMO
 Joey@LampAmp.tech

A Smart City Has Smart Sound

Based on a list of tested and approved LampAmp capabilities, we build *each* unit to fit the needs of cities and neighborhoods. Please mark an **X** next to the features below that best fit your needs.

Thank you for being one of the first to experience and provide feedback on a LampAmp demonstration.
